ATTACHMENT A

We give permission for wind monitors to be put on our property. (Where property owners approve)

We have not been at all at home anymore since these wind towers have been installed. The noise of these windmills keeps us up at night and makes it hard to work everyday. Our home is not the quiet place it use to be. Our dog barks constantly at the noise of the windmills thinking someone is coming. I (Sandy) work for IBM and I am gone from 4:30AM to 8:30PM. I have had to see my doctor because these windmills keep me up at night. At our home we are used to very little traffic and very little noise. Since these windmills have been put in there is more traffic (people wanting to see them) and the noise at sometimes will make your ears ring. We have put in complaints on these windmills and nobody has ever responded to our complaints and we also have never seen anyone here monitoring the noise of these windmills. Our place is the closest to the windmills and we are very upset that nobody has ever responded to our concerns. We will gladly accept any wind monitoring system so people can see just how loud these wind towers are.
