Last Month Neighbor Comparison

You used **20% MORE** electricity than your neighbors.

* kWh: A 100-Watt bulb burning for 10 hours uses 1 kilowatt-hour.

How you're doing:

You used more
than average

Turn over for ways to save

Who are your Neighbors?

■ All Neighbors

Approximately 100 occupied, nearby homes that are similar in size to yours (avg 1,716 sq ft)

■ Efficient Neighbors

The most efficient 20 percent from the "All Neighbors" group

Last Summer Cooling Comparison

Last summer, you used **35% more electricity on cooling** than your neighbors.

Best ways to save this summer:

Turn off your A/C before leaving home

Running your A/C all day is less efficient. Give it a break.

Use fans to keep cool when it's not too hot

Raise the thermostat 3–4° and stay just as comfortable.

Keep out the sun's heat with window shading

Heat from the sun makes your A/C work harder.
