05/08/2018	Carter, Keegan [PUBCOM]	I am deeply concerned that this wonderful city would consider giving up the freedom of having its own ISP that it controls. With the recent changes to net neutrality it becomes even more important to keep services like these in the hands of the public vs owned by private companies. Please consider the potential changes to privacy, and cost before making this decision. I can assure you both will be impacted negatively.	Filed
