*Letter from Town in Support
of ER Bennington Project*

TOWN OF BENNINGTON

March 31, 2016

Encore Renewable Energy
Attn. Derek Moretz
110 Main Street, Ste 2E
Burlington, VT 05401

RE: ENDORSEMENT OF 500KW NET METERED SOLAR PROJECT IN BENNINGTON, VT

Dear Mr. Moretz,

This letter highlights the Town of Bennington's support for the proposed 500kw net-metered solar project proposed on Route 7 in Bennington, VT by Encore Renewable Energy.

Encore has evaluated a number of sites and worked collaboratively with the Town on the siting and design of this project. A conceptual site plan was presented to the Select Board in October 2015 to discuss compliance with Town Plan and proposed Solar Ordinance including screening standards. Encore then presented the revised layout including the proposed screening plan to the Bennington Planning Commission on March 7, 2016. The Commission approved the plan provided Encore shift the landscaping from the fence line closer to Route 7. The further revised site plan, dated 3/08/16, including screening closer to Route 7 was presented again to the Select Board on March 14, 2016 at which point the Board voted to unanimously approve the project including the screening plan.

The Town appreciates Encore's efforts to work collaboratively on the siting and design of this project. We believe it to be in compliance with the Town Plan and standards included in the

Solar Ordinance. We look forward to reviewing the CPG filing for the project and reserve the opportunity for further comment.

Respectfully,

A handwritten signature in blue ink, appearing to read "Stuart A. Hurd", with a stylized flourish at the end.

Stuart A. Hurd

Town Manager
