11/29/2018	Tanis, Cole [PUBCOM]	I live in Morrisville Vt. and have CC for an internet provider. CC says I get 5MB internet that its able to watch HD video etc etc this couldn't be farther from the truth. At no time have I had internet close to approaching 5mb on average. videos at 240 P stop, talking to people in EU...they tell me I sound like a garbled robot . I think there should be more focus on stable/improved internet connections instead of just latent service calls. Thats one issue this is another. I hope things improve.	Filed
