

**GEORGIA SOLAR I, LLC DECOMMISSIONING PLAN**

**1. Introduction**

Georgia Solar I, LLC (the “Applicant”) has applied to the Vermont Public Utility Commission (“Commission”) for a Certificate of Public Good (“CPG”) under 30 V.S.A. § 248 authorizing the installation and operation of an up to 0.5 MW AC solar electric generation facility (the “Project”) in the Town of Georgia, Vermont. The Applicant will decommission the Project at the end of its operation according to the following plan.

**2. Decommissioning Plan**

The Applicant has prepared the following Decommissioning Plan in accordance with Commission Rules 5.904(A) and 5.107(C)(12). The Applicant shall:

- a. Be responsible for all decommissioning costs;
- b. Obtain any additional permits required for the decommissioning, removal and legal disposal of Project components prior to commencement of decommissioning activities;
- c. Remove and dispose of (preferentially recycle) facilities once they are no longer in service and the site shall be restored to its condition prior to installation of the facility to the greatest extent practicable;
- d. Because the Project is located in an area containing primary agricultural soils (“PAS”), the site shall be returned to its pre-construction condition to the extent possible, to enable use for agricultural purposes, and other measures shall be taken consistent with the AAFM Act 250 other measures shall be taken consistent with the AAFM Act 250 Procedure: *Reclamation of Vermont Agricultural Soils*, including with respect to sequencing soils excavated.
- e. Remove all hazardous materials and transport them to be disposed of by licensed contractors at an appropriate facility in accordance with rules and regulations governing the disposal of such materials.
