Re: Docket 7628  
Petition of Green Mountain Power Corporation ("GMP" or "Company") et al. re  
Kingdom Community Wind Project ("KCW")

Status Report Aircraft Detection Lighting System Approval

Dear Ms. Whitney:

This letter serves as a status report about Green Mountain Power's efforts to obtain approval of an Aircraft Detection Lighting System ("ADLS") in order to comply with Condition 34 of the Public Utility Commission's ("Commission") May 31, 2011 Order and Certificate of Public Good in the above-referenced docket.

As explained in the last status report, GMP continues to investigate the use of technology manufactured by Vestas that will locate equipment on the wind turbines rather than having to build new infrastructure. The radar equipment will be fixed to turbine 10, turbine 21, and a third radar located at an offsite cellular tower.

Since GMP's last status report, we have the following progress to report:

1. In August 2019, GMP received a communication from the Federal Aviation Administration ("FAA") as part of the FAA permit amendment review. The FAA has requested additional technical studies and information related to the radar system. These requests have been provided to Vestas for response.
2. Vestas is continuing to evaluate the results of its testing in Denmark and has not yet issued its final approval for use of the new system in Lowell.

Judith C. Whitney, Clerk

November 14, 2019

Page 2

Once Vestas has issued its approval of the system on KCW turbines and the FAA has issued the amended permits, GMP still expects to sign the lease with AT&T. A Federal Communications Commission license will also need to be obtained for the radio communication required with this Vestas system. GMP expects to engage with the Agency of Natural Resources further, as well as the Department of Public Service concerning the project before making the appropriate filing with the Commission prior to installation of the ADLS.

If GMP can address additional questions at this time, please do not hesitate to contact me.

Sincerely,

Preston Gregory
