

ERIC FITCH BIO

Eric Fitch is the Founder and CEO of PurposeEnergy. Since earning bachelor's and master's degrees in mechanical engineering from MIT, Fitch has spent his entire career with early stage, venture backed startups.

At MIT Fitch was a Teagle Scholar and a Ford EIP award winner. He was captain of the MIT alpine ski team and lettered in varsity crew and lacrosse. He held several offices in the Massachusetts Iota Tau chapter of the Sigma Alpha Epsilon fraternity.

Prior to PurposeEnergy, Fitch led sales in the northeast United States and Canada for a healthcare IT start-up; was on the founding technical team of a biowarfare hazard detection start-up; led the packaging team for a photonics technology company; qualified consumer electronics for regulatory approvals; and led product development and prototype projects for a smart materials start-up.

Fitch holds an array of domestic and international patents related to smart materials, biowarfare hazard detection, photonics, and biological treatment of organic materials.

Fitch is active in philanthropy and community service. He lives with his beautiful wife and three children in Windham, NH.
