RE: 20-2276-NM - Application of Margo Avery Trust for a certificate of public good for a 29.4 kW solar net-metered electric power system in Norwich, Vermont (the Project).

Dr. Ms. Whitney,

Green Mountain Power (GMP) is currently performing an engineering review of the Project pursuant to Vermont Public Utility Commission Rule 5.106(H). Our review requires additional time to complete.

GMP anticipates the review to be complete by October 12, 2020 and will communicate the results with the Project and the Commission on or before that date. We respectfully request that the Public Utility Commission (PUC) not issue a Certificate of Public Good (CPG) for the Project until our review is complete and has been communicated.

Please let me know if we can be of further assistance.

Sincerely,

Karly Carrara

Karly Carrara
