MAP 3: VEGETATED VIEWSHED MAP

[2-Mile Study Area]

October 2020

LEGEND

- Landmarks
- Recreation Sites
- 20' Contours
- Vermont Scenic Byways and Highways
- Vermont Trails
- Railroads
- 1-Mile Radius
- 2-Mile Study Area
- Town Boundary
- Canopy
- Hydrology
- Vermont Protected Lands
- Proposed Solar Array Layout

Visibility within Non-Forested Areas

High Low

NORTH

0 0.5 Miles

GIS viewshed mapping is a preliminary means of visual analysis. While beneficial for preliminary orientation and investigation, because of data assumptions and omissions, viewshed maps are not a definitive indication of visibility. Potential visibility needs to be confirmed through field investigation and other visualization techniques.

Elevation and obstruction data derived from LiDAR data, aerial imagery, the National Elevation Dataset and the National Land Cover Database.
