Hello I was just reaching out to ask about the no shutoff of utilities. Why is internet not essential seeing how at least one day if not all days are remote learning? I've been really good about paying everything and comcast has shutoff my internet twice. Not to mention they bill a month ahead of time so they turn it off for services I haven't even used yet!? Is there anyway that internet can be added as essential to a home with children still in school????
