

**STATE OF VERMONT
PUBLIC UTILITY COMMISSION**

Petition of Charter Fiberlink VT-CCO, LLC for Designation as an Eligible Telecommunications Carrier to Receive Rural Digital Opportunity Fund Auction (Auction 904) Support for Voice and Broadband Services	)))))))	Case No. _____
---	---------------------------------	----------------

**PETITION OF CHARTER FIBERLINK VT-CCO, LLC FOR DESIGNATION AS AN
ELIGIBLE TELECOMMUNICATIONS CARRIER TO RECEIVE RURAL DIGITAL
OPPORTUNITY FUND AUCTION (AUCTION 904) SUPPORT FOR VOICE AND
BROADBAND SERVICES AND
REQUEST FOR EXPEDITED CONSIDERATION**

Charter Fiberlink VT-CCO, LLC (“Charter Fiberlink”) respectfully submits this Petition for designation as an Eligible Telecommunications Carrier (“ETC”) to the Vermont Public Utility Commission (“Commission”) pursuant to Section 214(e)(2) of the Communications Act of 1934, as amended (the “Act”),¹ and Sections 54.201 and 54.202² of the Federal Communications Commission (“FCC”) rules. CCO Holdings, LLC (“CCO Holdings”), an affiliate of Charter Fiberlink, was selected as a winning bidder in Vermont³ under the FCC’s Rural Digital Opportunity Fund Phase I Auction (Auction 904) (“RDOF Auction”),⁴ and CCO Holdings assigned its winning bids to Charter Fiberlink in the RDOF Census Blocks identified in Exhibit A (“RDOF Census Blocks”). Charter Fiberlink’s receipt of RDOF Auction funding and building to these unserved areas, however, is conditioned upon Charter Fiberlink obtaining designation as an ETC in those RDOF Census Blocks.⁵ Accordingly, Charter Fiberlink seeks ETC designation in

¹ 47 U.S.C. § 214(e)(2).

² 47 C.F.R §§ 54.201 and 54.202.

³ See *Rural Digital Opportunity Fund Phase I Auction (Auction 904) Closes; Winning Bidders Announced*; FCC Form 683 Due January 29, 2021, Public Notice, DA 20-1422 (Dec. 7, 2020) (“*Auction 904 Results Notice*”).

⁴ See *Rural Digital Opportunity Fund Phase I Auction Scheduled for October 29, 2020; Notice and Filing Requirements and Other Procedures for Auction 904*, Public Notice, 35 FCC Rcd 6077 (2020) (“*Auction 904 Procedures Public Notice*”).

⁵ See *Auction 904 Results Notice*, at ¶ 36.

the RDOF Census Blocks in Vermont for which Charter Fiberlink was assigned CCO Holdings' winning bids in the RDOF Auction.

Section 214(e)(2) of the Act authorizes the Commission to designate a company that meets the requirements of 47 U.S.C. § 214(e)(1), such as Charter Fiberlink, as an ETC. As demonstrated in this Petition and Prefiled Testimony, Charter Fiberlink meets all requirements for ETC designation. Further, as shown by the descriptions in the Prefiled Testimony and Petition, designating Charter Fiberlink as an ETC in the RDOF Census Blocks would allow Charter Fiberlink, either directly or through its affiliates,⁶ to bring high-quality, innovative voice and broadband Internet access services to consumers in unserved portions of Vermont, advance the goals of universal service, and serve the public interest.

Ensuring that high-speed broadband service is available to those without access in Vermont has been a major priority of state lawmakers. By granting this Petition, the Commission has the potential to bring public and private investment to Vermont and to advance the state's goals in making sure that more of its citizens have access to high-speed broadband Internet services. The FCC estimates that Vermont has more than 19,330 unserved residential and small business locations,⁷ and granting this Petition will help to lower that number. While Charter Fiberlink, through other Charter affiliates, has participated in state programs to advance broadband buildout in Vermont, participation through RDOF presents a unique opportunity for Vermont to do more to bridge the digital divide in unserved areas. For the reasons set forth below, Charter Fiberlink respectfully requests that the Commission approve this Petition by no later than April 15, 2021.

⁶ Charter Fiberlink will directly provide the supported Lifeline voice services. Charter Fiberlink's broadband Internet access and voice services are provided with support of subsidiaries controlled and majority owned by Charter.

⁷ See *Auction 904 Results Notice*, at Attachment B, p. 3. The FCC defines "locations" as "housing units" and "small businesses" that receive "consumer-grade broadband service." See *Wireline Competition Bureau Provides Guidance to Carriers Receiving Connect America Fund Support Regarding Their Broadband Location Reporting Obligations*, Public Notice, WC Docket No. 10-90, DA 16-1363 (2016).

In support of its Petition, Charter Fiberlink states as follows:

I. OVERVIEW OF CHARTER FIBERLINK AND CHARTER

Charter Fiberlink. Charter Fiberlink is a Delaware limited liability company with a place of business at 12405 Powerscourt Drive, St. Louis, Missouri 63131. Charter Fiberlink is a majority owned and wholly controlled subsidiary of Charter Communications, Inc. (“Charter”), which is headquartered at 400 Atlantic Street, Stamford, Connecticut 06901. CCO Holdings and Charter Fiberlink are both subsidiaries of Charter. A copy of Charter Fiberlink’s registration with the Vermont Secretary of State is attached as **Exhibit B**. Charter Fiberlink is authorized by the Commission to provide local exchange telecommunications services in Vermont. Specifically, Charter Fiberlink holds a Certificate of Public Good (CPG No. 764-CR) issued by the Commission on December 4, 2003.

Charter. Charter is a leading broadband connectivity company, serving more than 30 million customers nationwide. Under the brand name Spectrum, the company offers a suite of advanced communications services, including broadband Internet access, cable video, voice, and mobile services.⁸ Through its subsidiaries, Charter provides these services in 41 states, including to approximately 15,000 customers in Vermont.

Helping to drive Charter’s rapid growth is Charter’s strong network investment which has significantly enhanced Charter’s broadband Internet access service and allowed Charter to better serve its customers in both urban and rural communities across the United States. In 2018-2019, Charter extended its network to more than 1.5 million unserved homes and businesses, 30% of

⁸ Certain of the subjects and benefits discussed in this filing pertain to non-jurisdictional products and services. While those items are included herein in order to provide a comprehensive view of the public interest benefits of designating Charter Fiberlink as an ETC, Charter Fiberlink respectfully reserves all rights relating to the inclusion of or reference to such information, including without limitation Charter Fiberlink’s legal and equitable rights relating to jurisdiction, filing, disclosure, relevancy, due process, review, and appeal.

which were in rural areas. And, from 2015 to 2019, Charter invested nearly \$40 billion in infrastructure and technology to expand the reach of its network.

Charter's customers directly benefit from Charter's commitment to and investment in its network. The FCC recently reported that Charter had one of the fastest, most consistent broadband Internet download speeds in the industry, including at peak times of the day when customer Internet usage is the highest.⁹ Additionally, recognizing Charter's experience and commitment to its customers, its network, and its products, *Multichannel News* recently awarded Charter as its "Operator of the Year for 2020."¹⁰ With millions working and learning from home due to the COVID-19 pandemic, access to dependable, high-speed broadband Internet access services and reliable voice services has never been more important, especially in the unserved areas comprising the RDOF Census Blocks. Further, Charter's network investment has spurred the development of products such as Charter's Spectrum Mobile service, which relies on the use of the Verizon Wireless mobile network and Charter's own broadband network infrastructure to provide fast, reliable broadband and voice services from customers' mobile phones.

Charter is committed to being part of a comprehensive solution to close the digital divide throughout the United States. With more than \$1.2 billion in RDOF funding awarded to the company across the country, Charter plans to continue its efforts as a leader in rural broadband

⁹ See *Ninth Measuring Broadband America Fixed Broadband Report, A Report on Consumer Fixed Broadband Performance in the United States*, FCC Office of Engineering and Technology (Aug. 3, 2020), pp. 15-16.

¹⁰ See *Cover Story: Charter's 'Giffen Good,' MultiChannel News* (Sept. 28, 2020), <https://www.nexttv.com/features/cover-story-charters-giffen-good#:~:text=Charter%2C%20the%20Multichannel%20News%20Operator%20of%20the%20Year,it%20completed%20the%20purchase%20of%20Time%20Warner%20Cable> (last visited Dec. 13, 2020) (stating that Charter "has managed record broadband and positive video subscriber growth during the pandemic by sticking to its game plan, initiated more than four years ago ... [including setting] out to make Charter's plant across its 41-state footprint fully digital (achieved in 2018), to roll out DOCSIS 3.1 (completed in 2018), to uniformly align products and packaging across all markets (as of Q4 2019, 85% of its customers were in Spectrum pricing and packaging) and to raise broadband speeds (in 2019, it raised the minimum speed to 200 Megabits per second for 60% of the footprint and that rate continues to grow; the remaining 40% are at 100 Mbps).").

deployment, bringing innovative, high-quality voice and broadband Internet access service offerings to unserved communities, including in Vermont. In fact, according to the FCC, it assigned Charter the most locations of any provider that participated in the RDOF Auction.

A. RDOF Support Assigned to Charter Fiberlink Will Enable Charter to Extend Voice Services to the RDOF Census Blocks

Charter provides voice communications services to over 9.3 million residential customers throughout its 41-state footprint using interconnected Voice over Internet Protocol technology.¹¹ Charter's voice service offering includes unlimited long distance calling in the United States, Canada, Puerto Rico, the US Virgin Islands, and Guam. Calling features include voicemail, call waiting, caller ID, call forwarding, and other features, at no additional charge. In addition, the E911 feature automatically provides the emergency service operator with a caller's phone number and location. With respect to its residential voice services, Charter offers customers a simplified pricing structure with plans that include all applicable fees¹² – thus permitting such customers to know their total costs in advance of choosing Charter's services, rather than facing a variety of complicated surcharges after they receive their first billing statement.¹³

The RDOF support assigned to Charter Fiberlink will help enable it to extend and maintain Charter's voice services to and within the RDOF Census Blocks.

¹¹ See Press Release, Charter Communications, Inc., *Charter Announces Third Quarter 2020 Results* (Oct. 30, 2020), <https://corporate.charter.com/newsroom/charter-announces-third-quarter-2020-results>.

¹² The rates, terms and conditions of Charter's voice service plans are subject to change in accordance with applicable federal and state regulations.

¹³ Charter Fiberlink remits fees, such as federal or state universal service fund fees or E911 fees, to the appropriate regulatory agencies, where required, and in accordance with law, but does not generally collect them as separate line items on the bill, in addition to the monthly rate that residential customers pay for Charter Fiberlink's voice service. All such fees are described in Charter Fiberlink's invoices for voice service in accordance with applicable federal and state billing requirements.

B. RDOF Support Assigned to Charter Fiberlink Will Enable Charter to Extend Broadband Internet Access Services to the RDOF Census Blocks

Charter's broadband Internet access services deliver industry-leading speeds to the vast majority of its 26.8 million residential broadband Internet customers.¹⁴ Charter now offers minimum download speeds of at least 200 Mbps in 60% of Charter's national footprint, and 100 Mbps everywhere else in the footprint—including households and small businesses in rural areas. On December 17, 2020, Charter announced that it plans to double Charter's broadband Internet access service starting speeds in additional markets, making 200 Mbps the starting flagship speed in 75% of Charter's communities. These speed enhancements will be available to new customers in these markets immediately. Existing customers will receive these speed increases with new Charter broadband Internet access service packages during the first quarter of 2021.¹⁵

Charter also offers a 1 Gbps connection with maximum download speeds of up to 940 Mbps to the vast majority of those same households, as well as to small and medium-sized businesses.¹⁶ Additionally, recognizing the need for fast, reliable broadband service for community anchor institutions, Charter offers 10 Gbps symmetrical speed broadband Internet connections to schools, libraries, hospitals, and other important community institutions.

As described in the Prefiled Testimony, the RDOF support assigned to Charter Fiberlink will enable it to extend Charter's broadband Internet access services to the RDOF Census Blocks in Vermont. The terms of the support assigned to Charter Fiberlink will require it to offer Charter's 1 Gbps connections in the RDOF Census Blocks. According to the FCC, these areas are currently

¹⁴ See *supra* note 11.

¹⁵ See Press Release, Charter Communications, Inc., *Spectrum Doubles Spectrum Internet Starting Speed to 200 Mbps in 17 Markets* (Dec. 17, 2020), <https://corporate.charter.com/newsroom/spectrum-doubles-internet-starting-speed-to-200-mbps>.

¹⁶ *Id.*

unserved by any broadband provider offering service at or above 25/3 Mbps. Granting this Petition will help extend broadband and unleash tremendous benefits to the communities within these RDOF Census Blocks. Charter's broadband deployment demonstrates its commitment to developing and deploying innovative broadband technology and services in unserved and/or rural areas.

Additionally, Charter's services will provide new and innovative services to previously unserved customers in the RDOF Census blocks, including by providing relief to customers struggling as a result of the COVID-19 pandemic. It will allow students and households to get or stay connected, and expand broadband Internet access and adoption among low-income households.

As part of its current broadband Internet access service plans, Charter offers *Spectrum Internet Assist*, a program for low-income households, which is available in its service area in Vermont and elsewhere.¹⁷ Charter does not require customers to sign long-term contracts for its services nor does the company impose early termination fees for failing to fulfill them.¹⁸ Charter maintains a focus on ensuring that the broadband user experience is a positive one.¹⁹

¹⁷ See *Spectrum Internet Assist*, Spectrum, <https://www.spectrum.com/browse/content/spectrum-internet-assist> (last visited Nov. 24, 2020). The rates, terms and conditions of Charter's *Spectrum Internet Assist* program are subject to change.

¹⁸ The rates, terms and conditions of Charter's Internet services are subject to change.

¹⁹ In the years ahead, cable providers will deploy revolutionary 10 Gbps networks within their footprints. See Press Release, NCTA, *Introducing 10G: The Next Great Leap for Broadband* (Jan. 7, 2019), <https://www.ncta.com/media/mediar-room/introducing-10g>. Successful 10 Gbps field tests by cable providers in residential settings have already occurred, and CableLabs has released specifications for DOCSIS 4.0, a new technical standard, to bring 10 Gbps speed capabilities to consumers. 10 Gbps will deliver to customers broadband speeds 10 times faster than what is delivered by today's networks and will have the speed and capacity to change the way we live.

III. CHARTER’S PARTICIPATION IN THE RDOF AUCTION

A. Background on the RDOF Auction

On February 7, 2020, the FCC issued a Report and Order establishing the Rural Digital Opportunity Fund, in which service providers would compete to receive up to \$20.4 billion to offer voice and broadband services in unserved high-cost areas.²⁰ Under this program the FCC will disburse federal universal service funds on a technology neutral basis to providers—including competitive local exchange carriers, cable operators, fixed wireless ISPs, satellite broadband providers, electric co-ops and electric utilities—for deploying voice and broadband-capable networks in these unserved areas.

B. CCO Holdings’ Selection as a Winning Bidder and Assignment to Charter Fiberlink

As noted in Prefiled Testimony, the FCC’s December 7, 2020 *Auction 904 Results Notice* announced that CCO Holdings was among the winners of the recently concluded RDOF Auction.²¹ Specifically, the FCC announced CCO Holdings as a winning bidder in 15 Census Blocks in Vermont. In accordance with the FCC’s procedures allowing winning bidders to divide and assign their bids to affiliated operating companies within the relevant state,²² CCO Holdings assigned its winning bids in Vermont to Charter Fiberlink. Charter Fiberlink must demonstrate to the FCC that it has been designated as an ETC in the RDOF Census Blocks where CCO Holdings was the winning bidder in Vermont. The FCC’s deadline for Charter Fiberlink to submit appropriate documentation of the ETC designation is June 7, 2021.²³

²⁰ *Rural Digital Opportunity Fund*, Report and Order, 35 FCC Rcd 686 (2020) (“RDOF Order”).

²¹ See *Auction 904 Results Notice*, at Attachment A, p. 4.

²² See *Auction 904 Procedures Public Notice*, at ¶ 43.

²³ See *Auction 904 Results Notice*, at ¶ 36.

C. Need for Expedited ETC Designation

As noted, CCO Holdings has been selected as a winning bidder in the RDOF Auction for 15 Census Blocks in Vermont. The timeframe for Charter Fiberlink to obtain ETC designation is short and, so that Charter Fiberlink may plan its RDOF construction and deployment schedule, Charter Fiberlink respectfully requests that the Commission grant Charter Fiberlink ETC designation on an expedited basis by no later than April 15, 2021. Granting this Petition on an expedited basis will benefit the citizens of Vermont by allowing Charter Fiberlink to meet its RDOF deployment milestones for voice and broadband Internet services in the RDOF Census Blocks and by allowing customers the opportunity to reap the benefits of Charter's broadband services, including by participating in telemedicine, remote work and remote education. Expedited Commission action would serve the public interest and advance the goals of universal service by expediting the deployment of high quality, innovative voice and broadband Internet services in these unserved portions of Vermont.

IV. CHARTER FIBERLINK'S FINANCIAL AND TECHNICAL QUALIFICATIONS

Charter is one of the nation's leading providers of broadband Internet access services and voice services, and Charter has played a significant role in expanding the availability of these services—especially broadband Internet access services—across the United States. Indeed, Charter Fiberlink and its affiliates currently provide high-quality voice and broadband services to approximately 26.8 million residential Internet access service customers and 9.3 million residential voice service customers in 41 states, including many in rural and “high cost” areas.

As described in Prefiled Testimony, Charter Fiberlink is highly qualified to meet the FCC's RDOF service obligations given Charter's proven track record of financial, managerial, technical and commercial success operating as an existing provider of broadband Internet and voice services.

In 2019, Charter generated over \$45 billion in revenue from the provision of all of Charter's services, along with approximately \$6.5 billion in income from its operations.²⁴ Charter Fiberlink will draw upon Charter's financial capability and extensive teams of experienced engineers with expertise in the fields of communications technology, hardware design, software development, data analytics, and networking to construct and/or install the networks and infrastructure necessary to provide the required services in the RDOF Census Blocks. Additionally, Charter Fiberlink will leverage the significant operational, managerial and technical expertise of Charter to perform all billing, installation, customer service, and other matters related to providing its services in Vermont. The Charter corporate family has extensive experience managing the technical and customer service-related issues associated with the provision of mass-market consumer voice and broadband Internet access (as well as other communications services). Charter monitors its network performance on a 24/7/365 basis and has implemented procedures to leverage its extensive engineering resources quickly and effectively to install, modify, repair, and/or restore services, as necessary.

This expertise made it possible for CCO Holdings to confidently participate in the RDOF auction with the certainty that Charter Fiberlink will be able to fulfill its RDOF network and service obligations.

V. CHARTER FIBERLINK MEETS ALL FEDERAL AND STATE STATUTORY AND REGULATORY REQUIREMENTS FOR ETC DESIGNATION

Charter Fiberlink meets all applicable federal and state requirements for designation as an ETC in Vermont, including 47 U.S.C. § 214(e) and 47 C.F.R. §§ 54.201 *et seq.*, as demonstrated in the Prefiled Testimony and as follows.

²⁴ 2019 Annual Report. Charter Communications, Inc., 2019, <https://ir.charter.com/financial-information/annual-reports>.

1) For purposes of its ETC designation, Charter Fiberlink will operate as a common carrier and offer interstate and intrastate communications on a common carrier basis in the RDOF Census Blocks. Designation as an ETC is a predicate to Charter Fiberlink's eligibility to receive RDOF support to provide voice and broadband Internet services in the RDOF Census Blocks (47 U.S.C. § 214(e)(1); 47 C.F.R. § 9.3; 47 C.F.R. § 54.201(d)).

2) Charter is a facilities-based broadband Internet access and voice service provider, with its own network, gateways, switching facilities, and other associated facilities. Charter Fiberlink will offer the RDOF supported services using its own facilities within the meaning of the FCC's rules or a combination of its own facilities and resale of another carrier's services (47 U.S.C. § 214(e)(1)(A); 47 C.F.R. § 54.201(d)(1)) within the RDOF Census Blocks.

3) As required by 47 C.F.R. § 54.101, Charter Fiberlink, either directly or through an affiliate, will offer voice services and broadband Internet access services supported by federal universal service support mechanisms, including the following capabilities within the RDOF Census Blocks:²⁵

Voice Grade Access to the Public Switched Telephone Network – Charter Fiberlink meets this requirement through the provision of a competitive voice service that includes minutes of use for local service provided at no charge to end users and access to emergency services via 911 or E911, wherever available from local government or public safety organizations.²⁶ Toll limitation services will also be offered to qualifying low income consumers as provided in the FCC's rules (47 C.F.R. § 54.101(a)(1)) in the RDOF Census Blocks.

²⁵ Charter's broadband Internet access and voice services are provided with support of subsidiaries controlled and majority owned by Charter.

²⁶ See Section I(A) of this Petition for a detailed description of Charter's voice service.

Broadband Internet Access Service – Charter’s broadband Internet access service provides the capability to transmit data to, and receive data from, all or substantially all Internet endpoints, including any capabilities that are incidental to and enable the operation of the communications service (47 C.F.R. § 54.101(a)(2)) in the RDOF Census Blocks.

Charter Fiberlink commits that these services will be provided consistent with applicable high-cost universal service support rules (47 C.F.R. § 54.101(c)) in the RDOF Census Blocks. Charter Fiberlink will also ensure that Lifeline voice and broadband Internet services are offered in accordance with the FCC’s rules in all Census Blocks where Charter Fiberlink has been assigned RDOF support (47 C.F.R. § 54.101(d)). Moreover, for its Lifeline voice service offering, Charter Fiberlink will offer to Lifeline-eligible customers a Charter voice service plan, as described above, at the discounted Lifeline voice service rate in the RDOF Census Blocks. This voice service plan is comparable (if not superior) to the Lifeline voice service offerings of other Lifeline providers in Vermont.

4) Charter Fiberlink will offer its voice service as a standalone service and at rates that are reasonably comparable to urban rates (47 U.S.C. § 254(b)(3); 47 C.F.R. § 54.313(a)(3)) in the RDOF Census Blocks.²⁷

5) In the RDOF Census Blocks, Charter Fiberlink will advertise the availability of its universal service offerings and charges for such offerings using media of general distribution (47 U.S.C. § 214(e)(1)(B); 47 C.F.R. § 54.201(d)(2)), and in a manner reasonably designed to reach those likely to qualify for the service (47 C.F.R. § 54.405(b)).

²⁷ See *RDOF Order*, at ¶ 42.

6) Charter Fiberlink will provide the supported services throughout the designated RDOF Auction assigned Census Blocks where it has customers (47 U.S.C. § 214(e)(1); 47 C.F.R. § 54.201(d)).

7) Charter Fiberlink certifies that, in accordance with 47 U.S.C. § 254(e) and 47 C.F.R. § 54.7(a), it will use federal universal service support only for the provision, maintenance, and upgrading of facilities and services for which the universal service support is intended.

8) Charter Fiberlink further certifies that it meets all applicable requirements for designation as an ETC under 47 C.F.R. § 54.202 as follows:

Compliance with Applicable Service Requirements. Charter Fiberlink certifies that it will comply with the service requirements applicable to the support that it receives,²⁸ including the requirements of the RDOF Auction.

Ability to Remain Functional in Emergency Situations. Charter has been providing voice and broadband Internet access services to customers on a 24/7/365 basis for almost twenty years. As part of providing these services, it is necessary to have in place contingency plans for emergency situations for each of Charter's major network hubs and/or facilities that are geographically distributed across the United States. These plans contain activation, staffing, escalation, and communication procedures to identify and respond to such emergencies. Additionally, all switching facilities are equipped with independent power generators and sufficient fuel to operate for several days to mitigate commercial power outages. The design of these facilities contains multiple levels of redundancy and autonomy that also mitigate the need for dedicated human interaction. Charter Fiberlink will apply this successful model to its RDOF services in the RDOF Census Blocks.

²⁸ 47 C.F.R. § 54.202(a)(1)(i).

VI. DESIGNATION OF CHARTER FIBERLINK AS AN ETC IS IN THE PUBLIC INTEREST

As a winning bidder in the RDOF Auction, Charter Fiberlink is eligible to receive funding to bring high-quality, innovative voice and broadband Internet access services to consumers in unserved portions of Vermont. The RDOF funding assigned to Charter Fiberlink will help enable it to “[b]ring digital opportunity to Americans living on the wrong side of the digital divide,”²⁹ and thereby advance the goals of universal service. Expedited Commission action on this Petition serves the public interest by accelerating the deployment of high-quality, innovative voice and broadband Internet access services in unserved portions of Vermont that Charter Fiberlink and its affiliates will serve in the RDOF Census Blocks.

A. Broadband Deployment Will Promote New Investment, Job Growth and Opportunities in Vermont

Bringing broadband Internet access to unserved areas of Vermont has been a major priority of state lawmakers. Representative Tim Briglin, Chair of House Energy and Technology Committee, stated that without broadband access “[m]any who live in rural areas, cannot attend school, cannot go to work, and may not be able to access medical care.”³⁰ Senator Becca Balint, the Vermont Senate’s incoming President Pro Tem, also observed that broadband investment “is not just an economic issue, but ... it’s also an educational issue and a telehealth issue, ... and it’s much more critical to community function than perhaps many people realized.”³¹ Granting this Petition will serve the public interest through the deployment of broadband Internet and voice services to unserved high-cost areas in Vermont. Deployment of those services will spur

²⁹ *RDOF Order*, at ¶ 1.

³⁰ See House Approves \$95 Million Broadband and Housing Aid Package, [www.VTDigger.org](https://vtdigger.org/2020/06/18/house-approves-95million-broadband-and-housing-aid-package/) (June 18, 2020), <https://vtdigger.org/2020/06/18/house-approves-95million-broadband-and-housing-aid-package/>.

³¹ See *Broadband Plan Offers Ways to Connect 61,000 More Households*, [www.VTDigger.org](https://vtdigger.org/2020/12/15/broadband-plan-offers-ways-to-connect-61000-more-households/) (Dec. 15, 2020), <https://vtdigger.org/2020/12/15/broadband-plan-offers-ways-to-connect-61000-more-households/>.

investment in facilities and equipment and promote new economic opportunities and job growth in Vermont.

Designating Charter Fiberlink as an ETC will permit it to receive RDOF Auction funds for 15 Census Blocks in Vermont, directly advancing the goals of the RDOF Auction and universal service in those RDOF Census Blocks. Charter's deployments will bring expanded voice and broadband connectivity to these areas, which will help close the digital divide for residents of Vermont and expand economic opportunity and job growth in communities that will benefit from increased connectivity. Vermont lawmakers are also calling for more access to broadband, especially in rural areas like those associated with the RDOF Census blocks. Because granting this Petition will allow Charter Fiberlink to use the RDOF funds as intended to expand voice and broadband Internet access services in the RDOF Census Blocks in Vermont, designating Charter Fiberlink as an ETC is in the public interest.

B. Access to Broadband Will Transform Rural and Unserved Areas

The availability of Charter's RDOF supported broadband Internet access services and voice services will have a transformative effect on the unserved and/or rural areas in the RDOF Census Blocks. Charter is committed to expanding access to this life-changing broadband connectivity that will enable consumers to use new technologies, such as distance education, telemedicine, live streaming video, or interactive programming (e.g., a Zoom call). These technologies will create new opportunities for consumers in education, healthcare, business, and civic engagement activities. For example, with access to an online network made available through a Charter broadband Internet connection, an individual may start their own business or take online classes in pursuit of an education. Similarly, local businesses, through use of Charter's broadband Internet and voice services, may connect to vendors and employees, grow their sales, and create new jobs.

In short, Charter's broadband Internet access and voice services will enhance the opportunities available to the consumers served by Charter Fiberlink and its affiliates in the RDOF Census Blocks.

C. The Public Will Benefit from Charter's Experience as A Lifeline Voice Service Provider

As set forth in Prefiled Testimony, Charter and its subsidiaries have substantial experience in providing Lifeline voice services to low income consumers and communities, which provides Charter Fiberlink with important familiarity with the FCC's Lifeline program and with the interactions necessary with the Universal Service Administrative Company, the National Lifeline Accountability Database, and other third party Lifeline administrators. These experiences will facilitate Charter Fiberlink's swift offering of Lifeline voice services for qualifying low-income customers in the Census Blocks where Charter Fiberlink receives RDOF support in Vermont.

D. The Public Will Benefit from Charter's Customer-Oriented Policies, Such as Those During The COVID-19 Pandemic

At the onset of the COVID-19 pandemic, Charter joined other telecommunications providers in the Keep Americans Connected Pledge. As part of that effort, Charter voluntarily committed to suspend collections and not charge late fees or terminate service for residential or small business customers who informed Charter that they were experiencing COVID-related economic challenges. Charter extended its commitment through June 30th. During that time, Charter kept connected approximately 700,000 customers who had difficulties meeting bills because of COVID-related economic hardship. Charter has also forgiven approximately \$85 million in customer overdue balances.

Additionally, as schools across the country began to transition to remote learning in March, Charter took action to benefit students, faculty and families. Charter committed to offering

broadband Internet service up to 200 Mbps for free for 60-days, including in-home Wi-Fi and a self-installation kit, to households with K-12 and/or college students or educators who did not already have a Charter broadband Internet service subscription for sixty days. Charter extended this offer through June 30th and, by the end of the 2020 school year, Charter was able to help nearly 450,000 students and teachers nationally continue schooling through remote learning. To help ease the strain for families and teachers who still lacked broadband, Charter relaunched its Remote Education Offer beginning on September 21, 2020.

Furthermore, for schools and school districts seeking to establish a centralized purchasing arrangement for the benefit of both students and teachers to support remote learning, Charter currently offers Stay Connected K-12 throughout the Charter footprint. Under Stay Connected K-12, Charter contracts directly with schools and school districts to assist them in offering high-speed broadband Internet access to students, educators and staff in their homes. Charter's Stay Connected K-12 is designed as a single-payer option for communities to allow payment by a school or school district, based upon the number of connections purchased. This partnership between Charter and the school or school district helps to ensure that learning, teaching, and working are uninterrupted by giving schools and school districts the flexibility to add students to the program, when needed, and to provide much needed in-home broadband Internet connectivity.

Lastly, recognizing the importance of digital skills during this time of unprecedented volume in distance learning and remote working, Charter has doubled the amount of funds available for its Spectrum Digital Education Grants for 2020-21.³² These customer-oriented policies, along with others that Charter implements from time to time, will enhance the choices

and capabilities available to the consumers served by Charter Fiberlink and its affiliates in the RDOF Census Blocks.

E. The Public Will Benefit from Charter’s Advanced Service Offerings

Designating Charter Fiberlink as an ETC in the RDOF Census Blocks will promote the deployment of advanced voice and broadband Internet services in these areas. Charter is widely recognized as a premier provider of voice and broadband Internet offerings that relies on advanced systems, technologies, and infrastructure. Charter provides voice and broadband Internet services to approximately 26.8 million residential Internet access service customers and 9.3 million residential voice service customers in 41 states. Its investments have enabled it to offer minimum download speeds of at least 200 Mbps in 60% of Charter’s national footprint, and 100 Mbps everywhere else in the footprint—including households and small businesses in rural areas. On December 17, 2020, Charter announced that it plans to double Charter’s broadband Internet access service starting speeds in 17 U.S. markets, making 200 Mbps the starting flagship speed in 75% of Charter’s communities. These speed enhancements will be available to new customers immediately. Existing customers will receive these speed increases with new Charter broadband Internet access service packages during the first quarter of 2021.³³

Charter also offers a 1 Gbps connection with maximum download speeds of up to 940 Mbps to the vast majority of those same households, as well as to small and medium-sized businesses. Charter’s broadband Internet service offerings enable customers “to use tomorrow’s Internet applications as well as today’s.”³⁴ These levels of service will be made available to consumers in Charter Fiberlink’s RDOF Census Blocks, as well.

³³ See *supra* note 15.

³⁴ *RDOF Order*, at ¶ 2.

VII. CONCLUSION

For the reasons stated herein, Charter Fiberlink respectfully requests that the Commission designate Charter Fiberlink as an ETC in the RDOF Census Blocks identified in Exhibit A by no later than April 15, 2021 and order such other relief as may be appropriate.

Dated at Burlington, Vermont, this 6th day of January, 2021.

Respectfully submitted,

Charter Fiberlink VT-CCO, LLC,
By its Attorneys
