Re: Silo Antenna Changes  
East Montpelier, Vermont  
Verizon Site #583634; Montpelier East VT-A

Dear Andrew,

All-Points Technology Corporation, P.C. (APT) reviewed equipment proposed by Verizon Wireless to be installed on the silo located at 141 Lyle Haven Road in East Montpelier, Vermont. Verizon proposes to add six Andrew NHH-65B-R2B & three Samsung XXDWMM-12.5-65-8T-CBRS panel antennas, three B2/B66A RRH-BR049, three B5/B13 RRH-BR04C & three CBRS RT4401-48A remote radio heads (RRHs), and one DB-C1-12C-24AB-0Z power/fiber distribution box (D-box), fed by two fiber lines.

The proposed antenna additions represent insignificant wind and dead loads on the silo compared to global wind loads on the structure. Our review indicates the structural integrity of the silo will not be compromised by installation of the proposed antennas and associated appurtenances.

Please feel free to call if you have any questions.

Sincerely,  
**All-Points Technology Corporation, P.C.**
