MEMORANDUM

To: rb Technologies, LLC
From: Rowan Cornell-Brown, Reviewer *RCB*
Re: 21-1054-NM – Incomplete Filing
Date: March 17, 2021

On March 11, 2021, the Vermont Public Utility Commission (“Commission”) received from rb Technologies, LLC, an application for a 44.2 kW solar net-metering system in East Montpelier, Vermont. Commission staff have reviewed the application and determined that it is incomplete for the following reasons:

1. The project site plan does not include the approximate property boundaries and setback distance from those boundaries to the corner of the closet project-related structure and approximate distances to any nearby residences. [Rule 5.106(D)(5)(b)]
2. The project site plan does not include the latitude and longitude coordinates for the proposed project. [Rule 5.106(D)(5)(h)]

Please file the appropriate information or documents with the Commission to complete your application. Your application will not be processed until the Commission receives the required information. The applicable comment period will not begin until the Commission has determined that your application is administratively complete. You will be notified when that determination is made.
