Hi Will- As just discussed, this is to confirm that VDHP has no archaeological or above ground historic site concerns for this project as currently designed. The archaeological finding is contingent on placement of the underground electrical connection to the existing distribution system within the existing access road footprint as shown in the overall site plan. Any changes to this design would require additional review. Thanks, Scott

Scott
Hope you are doing well. We submitted our check list for this project a while back and additionally we have submitted our 45 day notice a while back and we are about to file our final petition. Most recent site plan attached along with the 45 day notice.

We believe there to be no issues or impacts to the historic/archeological impacts for the project.
Can you please email us a statement to that effect if you are in agreement? We need to file this by the 11th of August.
Best,
Will
