MEMORANDUM

To: Norwich Upper Loveland Solar LLC
From: Rowan Cornell-Brown, Reviewer *RCB*
Re: 21-3587-NMP – Incomplete Filing
Date: September 8, 2021

On August 31, 2021, the Vermont Public Utility Commission (“Commission”) received your application for a 500 kW solar group net-metering system in Norwich, Vermont. Commission staff have reviewed the application and determined that it is incomplete for the following reason:

1. Because the host parcel is subject to an Act 250 Land Use Permit, the applicant must file a document describing whether the construction of the proposed net-metering system will interfere with the satisfaction of any condition contained in the Act 250 Land Use Permit. If the construction will interfere with the satisfaction of any Act 250 Land Use Permit condition, the applicant must explain what steps it will take to address such issues or why the applicant is unable to do so. (Rule 5.107(13))

Please file the appropriate information or documents with the Commission to complete your application. Your application will not be processed until the Commission receives the required information. The applicable comment period will not begin until the Commission has determined that your application is administratively complete. You will be notified when that determination is made.
