Re: Rule 19-0855 Request for Participation and Presentation at September 16, 2021 Workshop

Dear Ms. Anderson:

On July 1, 2021, the Notice of Workshops and Request for Comments were ordered by the Public Utility Commission ("Commission") whereby the workshops will review potential changes to Rule 5.100. Renewable Energy Vermont ("REV") requests approximately 35 minutes at the September 16, 2021 *Net Metering Compensation Workshop* to present on this topic. Specifically, REV proposes to present general recommendations to the Rule 5.100 application process and to discuss topics related to alternative compensation for net metering. The following REV members and REV's Executive Director will present on behalf of REV during this time period: James Moore, Jim Merriam, Kim Hayden, and Peter Sterling.

Respectfully submitted,

/s/ Lisa Cline
