**Re: Case No. 22-0334-INV – PUC Rule 5.128(D) Biennial Net-Metering Proceeding
GMP Revised Report**

Dear Ms. Anderson:

Green Mountain Power Corporation (“GMP”) submitted its biennial net-metering report pursuant to PUC Rule 5.128(D) on February 15, 2022, and has since found three minor changes that are reflected in the updated report filed with this letter, as follows:

1. Added the Middle Road Solar project (line 10, NM Data tab), first proposed in 2017 but not yet interconnected; after review, we found that this project did not fall within the reporting dates of proposed projects in our last biennial report and therefore was not included.
2. Updated the Aegis Renewable Energy project (line 58, NM Data tab), to correct the project’s vintage designation.
3. Corrected the vintage dates on the siting adjustor table template used in the Definitions tab.

Thank you for your review of this filing and please reach out with any questions.

Sincerely,

Carolyn Browne Anderson
