SCOTT W. HOMSTED, P.E.

Principal

Mr. Homsted joined Krebs and Lansing in 1995 and became a partner in 2007. Mr. Homsted has extensive experience related to civil engineering design, permitting, and construction management for a wide variety of public works, industrial, commercial and residential projects. Mr. Homsted is well established and provides expert knowledge in stormwater analysis and design, on site and municipal wastewater systems, water system modeling and design, and erosion prevention and sediment control. He has over 20 years of experience in mapping and modeling of a wide variety of new and existing stormwater collection and treatment systems.

Mr. Homsted's stormwater experience include work on design, Section 248 Petition, Land Use Permitting, and/or construction services on numerous projects in Vermont including Kingdom Community Wind and Vermont Air National Guard Base, in addition to residential subdivisions, educational campuses, and industrial commercial complexes. Mr. Homsted is responsible for the annual inspection, reports, and certifications for over twenty permitted projects throughout the State of Vermont.

Mr. Homsted was an active participant and commentator during a series of stakeholder meetings and workshops in conjunction with the Vermont DEC Stormwater Section used to update and amend the Vermont State Stormwater Management Manual (VSSMM). The VSSMM is the governing document for all stormwater systems in Vermont requiring permits.
