Re: Case No. 23-2221-INV
Investigation into the Clean Heat Standard Delivery Agent Costs and Quantities

Dear Ms. Anderson:

Vermont Gas Systems, Inc. ("VGS") is pleased to participate in this important proceeding to establish a default delivery agent ("DDA") credit costs and initial quantity of generated credits.

As an obligated party, VGS is very interested in the development of the DDA, its structure, and its implementation. We are also interested in the development of a process for obligated parties who wish to manage all or a portion of their obligation independent of the DDA, which may be an appropriate matter for discussion within this proceeding. We do not have a preference as to whether the Commission should follow contested case procedures.

We appreciate the opportunity to comment and look forward to engaging in a collaborative process to carefully craft this important policy. Please contact me with any questions.

Respectfully submitted,

/s/ Mary G. Bouchard
