Good Morning Meghan,

I hope that this email finds you well and that you had a nice weekend.

I have attached a copy of the Farm Methane application that our company Vermont Renewable Gas, LLC placed in the mail last Monday. Ioana Drew suggested that we may email you a copy; so I thought I might do so to assure that you receive it.

Have a great start to your week, and I look forward to hearing from you soon!

Best Regards,

Evan

## Supplemental Material – Feedstock Sourcing

Vermont Renewable Gas – Lyndon, will use project feedstock that is at least 51% from Agricultural Operations.

At least 80% of the project feedstock will come in the form of wastes and products derived from Agricultural Operations. These Agricultural Operations are engaged in the cultivation or other use of land for the growing of fiber, Christmas trees, maple sap, horticultural, and orchard crops in the State of Vermont.

No more than 20% of feedstock will come in the form of organic wastes from non-agricultural sources including yard wastes, as well as trimmings such as from public rights of way maintenance.
