

Viewpoint 1a: Approximately 180° panoramic view from within the Project site, towards the center of the proposed array area, panning from west (left) to east (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 1a: View looking north from the Project site towards Lower Newton Road. This view is represented by the orange rectangle in the image above. (50mm)

Viewpoint 1b: Approximately 180° panoramic view from the Project site (continuation of the previous panoramic view for full 360°), panning from east (left) to west (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 1b: View looking southeast from the Project site towards Dunsmore Road and single-family residences. This view is represented by the orange rectangle in the image above. (50mm)

Viewpoint 2: Approximately 180° panoramic view from Dunsmore Road southeast of the Project Site, panning from southwest (left) to northeast (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 2: View from Dunsmore Road looking northwest towards the Project site. When viewed from this location, the Project site has limited visibility beyond intervening hedgerows. (50mm)

Viewpoint 3: Approximately 180° panoramic view from Dunsmore Road southeast of the Project site, panning from southwest (left) to northeast (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 3: View from Dunsmore Road looking northwest towards the Project site. When viewed from this location, the Project site is partially visible beyond intervening hedgerows. (50mm)

Viewpoint 4: Approximately 180° panoramic view from Dunsmore Road east of the Project site, panning from southwest (left) to northeast (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 4: View from Dunsmore Road looking northwest towards the Project site. The Project site is partially visible behind foreground vegetation and a middleground hedgerow. (50mm)

Viewpoint 5: Approximately 180° panoramic view from Dunsmore Road east of the Project site, panning from south (left) to north (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 5: View from Dunsmore Road looking west towards the Project site. The Project site is partially visible behind a middleground hedgerow. (50mm)

Viewpoint 6: Approximately 180° panoramic view from Dunsmore Road east of the Project site, panning from south (left) to north (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 6: View from Dunsmore Road looking west towards the Project site. The Project site is partially visible behind foreground vegetation and a middleground hedgerow. (50mm)

Viewpoint 7: Approximately 180° panoramic view from Dunsmore Road northeast of the Project site, panning from southwest (left) to northeast (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 7: View from Dunsmore Road looking southwest towards the Project site. The Project site is partially visible behind foreground vegetation and a middle-ground hedgerow. (50mm)

Viewpoint 8: Approximately 180° panoramic view from Lower Newton Road at Dunsmore Road northeast of the Project site, panning from southeast (left) to northwest (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 8: View from Lower Newton Road at Dunsmore Road looking southwest towards the Project site. The Project site is partially visible behind foreground vegetation and a middleground hedgerow. (50mm)

Viewpoint 2: Approximately 180° panoramic view from Lower Newton Road northeast of the Project site, panning from southeast (left) to northwest (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 2: View from Lower Newton Road looking southwest towards the Project site. The Project site is partially visible behind a middleground hedgerow. (50mm)

Viewpoint 10: Approximately 180° panoramic view from Lord Road north of the Project site, panning from east (left) to west (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 10: View from Lord Road looking southwest towards the Project site. The Project is in a distant background field when viewed from this location. (50mm)

Viewpoint 11: Approximately 180° panoramic view from Lower Newton Road north of the Project site, panning from southeast (left) to northwest (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 11: View from Lower Newton Road looking south towards the Project site. The Project site is in a distant background field, beyond the existing solar array visible at left. (50mm)

Viewpoint 12: Approximately 180° panoramic view from Firefly Lane at Lower Newton Road north of the Project site, panning from northeast (left) to southwest (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 12: View from Firefly Lane looking south towards the Project site. The Project site is in a distant background field, beyond the long existing hedgerow visible at center right. (50mm)

Viewpoint 13: Approximately 180° panoramic view from Firefly Lane north of the Project site, panning from northeast (left) to southwest (right). The orange rectangle represents the image below, which is captured with a 50mm focal length.

Viewpoint 13: View from Firefly Lane looking south towards the Project site. The Project site is partially visible behind a middle-ground hedgerow. (50mm)
