7.35% increase for 10/25-9/30/26 is an excessive amount. Rate payers already have additional fees to pay on our bills: energy efficiency charge, electric assistance program, current energy/major storm adjuster, extreme storm restoration fund. Seems like a kick in the gut to do what we can...installed solar panels, bought energy efficient appliances, use led bulbs to then be hit with a rate increase. Sorry but no one gets a raise of 7.35% /years time in Vermont. There is too much uncertainty in the economy due to the current political climate to add this extra burden to Vermonters. Sincerely Joanne Holler,
