

STOWE ELECTRIC DEPARTMENT
PO BOX 190 | 435 MOSCOW ROAD
STOWE, VT 05672

**TOWN OF STOWE ELECTRIC DEPARTMENT
ELECTRIC VEHICLE AND ELECTRIC VEHICLE CHARGING EQUIPMENT
FLEXIBLE LOAD MANAGEMENT PROGRAM**

AVAILABILITY

Eligible Town of Stowe Electric Department ("SED") residential or commercial customers that meet the terms of SED's electric vehicle flexible load management program ("Program") and opt into SED's Time of Use Rate ("TOU").

APPLICABILITY

This Program is offered to satisfy Act 55, Section 33 which requires SED to offer rates that encourage the efficient integration and increased adoption of electric vehicles ("EV") and electric vehicle supply equipment ("EVSE") within its service territory. Participation in this Program is voluntary and to participate an SED customer must have AMI metering, enroll in the Program's customer portal, enroll in the TOU rate available to their customer class, enroll either a compatible EV or EVSE into the Program, and participate in peak curtailment events.

DURATION OF CONTRACT

This Program requires a 12-month minimum enrollment in the Program and TOU Rate. After the first enrollment period, participants will remain in the Program until they notify SED at least 30 days before their enrollment anniversary date that they want to change their rate of service. Participants are eligible for an additional one-time incentive for enrolling an eligible device into SED's flexible load management program.

PEAK EVENTS

To receive the monthly benefit, enrolled customers must participate in monthly system peak curtailment calls ("event"). Enrolled participants will receive a signal to

curtail their EV or EVSE during peak demand. SED anticipates at least one event per month, and each event will last no longer than five hours. Participants should anticipate 5 events per month, with a typical event lasting 2-3 hours. Participants will have the option to opt out of individual events. However, a participant who opts out of two or more events each month will not receive the monthly incentive. A participant's EV that is not within SED's territory at the time of an event or EVSE that is not available during an event are not eligible to receive the monthly incentive for curtailing demand.

PROGRAM INCENTIVES

Participants enrolled in this Program are eligible for a reduced off-peak rate under the TOU Rate to charge their EV, Tier III rebates for EV and EVSE, a one-time enrollment incentive for each device enrollment, and a monthly incentive, paid quarterly, for participating in curtailment events.

ADDITIONAL TERMS OF SERVICE

- At the time of enrollment customers shall not be in arrears on their current SED monthly bill.
- This is an optional opt-in Program for SED customers who meet the program requirements.
- Terminating either the TOU Rate or the flexible load management program will automatically remove the customer from the program.
- Customers may be eligible for an additional enrollment incentive offered in collaboration with Efficiency Vermont. Customers must meet the terms and conditions offered by Efficiency Vermont.
- Such other terms and conditions of SED, in effect from time to time that are also not inconsistent with any specific provisions of this Program, are also part of this offer.

EFFECTIVE

Effective for service rendered on or after October 1, 2025.
