To Whom it May Concern: I received a notice in my GMP bill about this increase. How the hell do you expect Vermonters to be able to keep affording to live in Vermont? I did not ask for there to be tariffs attached to my bill. GMP is constantly asking for increases each year. This is getting ridiculous. As people getting ready to retire in 2 years who can't even afford to retire because Vermont is about the wealthy and not about the low income or middle class this is outrageous. We have tried everything to lower our GMP bill to the best of our ability. Yet our bills keep increasing every month. We cannot afford to put solar panels on our home, we sit in the dark at night to watch TV, we are diligent about shutting off our lights when we are leaving a room, we use energy saving light bulbs yet our bill does not reflect any of that. Yes we have to run AC units in the summer months. This should not be held against us for 3 or 4 months. Our bill alone this month was 179.29 and now you're saying next year it would increase by \$9.00 per month so I can look forward to paying \$200.00 a month for electricity. Would GMP like to pay my mortgage, my natural gas, my insurance, my property taxes, my vehicle payments etc.? Stop allowing this to happen. GMP needs to eat the cost of the tariffs. You're all pushing Vermonters to leave this state. Melissa LaFrance a very angry customer and born and raised Vermonter.
