

Case No. 25-1543-PET

September 5, 2025

I move to intervene on aesthetics and the town plan.

I have lived at 92 Gilman St. in Marshfield village since the early 1980's & raised my family here.

Where my home sits, I have a clear view of the ridgeline of the proposed cell tower. The tower would clearly rise above the ridgeline where the sun sets. This tower is very close to the village where our vibrant community enjoys the beauty of our scenic landscape. I enjoy sunset views in all four seasons & the tower would obstruct those views. Coming into the village, the cell tower would be a visible welcoming into our community.

Keeping with Marshfield's town plan which was adopted in August 21, 2018, maintaining rural character of the community as defined by its traditional village area, open spaces & forested hills, as well as the human activities thereon. The location of the tower is in a part of town that is identified as a scenic protection area. Our town municipality and state regulators should honor the town plan.

My participation will not delay the proceedings or prejudice the interests of other parties.

I request a hearing.
