RE: Williston H Solar, LLC's Petition for a Certificate of Public Good in accordance with 30 V.S.A. § 248 regarding a proposed 2.75 MW ground-mounted solar array to be located off Redmond Road in Williston, Vermont.

Dear Director Poor:

Pursuant to 30 V.S.A. § 202(f), Williston H Solar, LLC requests a determination by the Department of Public Service that the proposal to construct a 2.75 MW ground-mounted solar array off Redmond Road in Williston, Vermont (referred to as the "Project") is consistent with the Vermont Twenty-Year Electric Plan.

The Project is described in greater detail in a Petition and Prefiled Testimony of Jake Clark, et al., which I am submitting to the Public Utility Commission today for approval under 30 V.S.A § 248. The Department will have access to the file via ePUC.

As described more fully in the testimony, Petitioner contends that Project complies with the Twenty-Year Electric Plan. Petitioner thanks you in advance for your review on that issue and stands by to assist with any questions you may have.

Very truly yours,

/s/ Anthony N.L. Iarrapino
