Re: Case No. 25-2590-PET – VELCO’s Reply to the Department’s Comments on Motion for Confidential Treatment

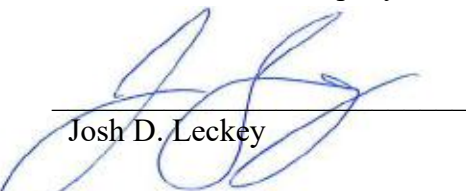

Dear Mrs. Anderson:

Vermont Transco LLC and Vermont Electric Power Company, Inc. (collectively, “VELCO”) have reviewed the response of the Vermont Department of Public Service (the “Department”) to VELCO’s motion for confidential treatment of Exhibit PET-JP-4, the Highgate Converter Performance Review.

Based on the Department’s comments, VELCO is filing a partially redacted version of the exhibit, with the summary, table of contents, and lists of figures and tables largely unredacted. VELCO continues to seek confidential treatment for the full remaining portion of the exhibit, which it has filed under seal because it contains Critical Energy Infrastructure Information. VELCO appreciates the Department’s comments and its support for confidential treatment of this remaining portion of the exhibit.

Thank you for your attention to this matter.
