To whom it may concern,

I am writing to express our concern regarding the potential tower that is being proposed in the town of Rochester. It seems that not only will the tower be a health hazard for anyone owning property near the tower, it will likely create erosion problems for homes below the proposed tower, certainly be an eye sore for everyone and effect property values. We recently bought property and built a home on Austin Hill Rd with gorgeous mountain views. The tower will be in the site line of our home, interrupting our unspoiled mountain views with an unsightly tower. While I appreciate the argument for better cell service in the Route 100 corridor, this can be achieved with a more subtle solution. We are very much against the proposed tower being built in Rochester.

Thank you,

Sara and Michael Murphy
