I am writing in response to the recent request from GMP for a rate increase of 7.50% starting 1 October. CASE 2026.TF. GMP has been getting rate increases regularly for years. It has also been getting fee adjustments that have been added and increased over the years. I think it is about time customers get more preference than power companies. I am lucky that I have solar panels and Tesla batteries but I do notice that GMP pays me much less for the power I send to them than the power coming from the grid costs me.

Please consider a much more equitable solution.
