Re: Case No. 25-1809-TF. Town of Stowe Electric Department/tariff requesting approval of EV rates

Dear Ms. Anderson:

On March 19, 2026, the Vermont Department of Public Service (“Department”) filed its recommendation that the Vermont Public Utility Commission (“Commission”) should issue a proposal for decision that the Department and the Town of Stowe Electric Department (“SED”) can comment on. SED agrees with the Department that further briefing, additional prefiled testimony, and extending the Commission’s approval of SED’s proposed electric vehicle and electric vehicle supply equipment flexible load management program (“Program”) is not warranted.

SED filed a draft proposed order on December 30, 2025, which can form the foundation to resolve this docket. SED can provide an update to its December 30th filing to reflect subsequent filings in this docket, or the Department could provide a redlined version of SED’s December 30th filing to facilitate a conclusion to this docket.

SED respectfully requests that the Commission enter an Order approving the proposed tariff filed in this docket to meet SED’s statutory obligations pursuant to Act 55, Section 33.

Dated at Stowe, Vermont this 25th day of March 2026.
