 02/20/2026	Barrgrove, Sally [PUBCOM]	My electric bills have gone. up 50.4% since 2023, and 2026 looks to be well above the previous year's total. a 7.5% raise in rates is absurdly beyond inflation rates, particularly since so many add-on charges are now part of the bill. I have solar panels on my home, but it's becoming less significant. Is it because AI is sucking up all the energy in Vermont? Please deny this request above inflation.	Filed
