| <div> <div></div> <div>04/13/2026</div> </div>             | Fourie, Philippa [PUBCOM] | This tower should not be placed in a site where there will be a negative visual and historic impact. It only has space for 1 potential collocation which does not satisfy the public good and antennae can be placed on silos instead. I live only a few hundred feet from proposed site; no family should ever have to live this close to a radio tower as construction and generator noise pollution moving forward will disrupt the peace of living and radio towers depreciate neighboring property values. | Filed     |               |
