

STATE OF VERMONT
PUBLIC SERVICE BOARD

EEU-2010-06

In re: EEU Demand Resources Plan)

Order entered: 2/13/2015

ORDER REQUESTING COMMENTS ON WHETHER PROCEEDING SHOULD BE CLOSED

The Public Service Board ("Board") initiated this workshop process to develop the first Long-Term Demand Resources Plan ("DRP") for the Energy Efficiency Utility¹ ("EEU") program. A DRP includes short- and long-term energy efficiency budgets and energy savings goals, Quantifiable Performance Indicators for each EEU for the three-year performance period, and descriptions of services to be provided by each EEU over the forecast periods. All long-term components of a DRP are revisited every three years through subsequent workshop processes.

The three-year performance period covered by the first DRP was 2012-2014. This time period is now past, and the long-term components of the first DRP have been reviewed in proceeding number EEU-2013-01. Accordingly, we would like participants to file comments on whether the instant proceeding should now be closed. Such comments should be filed on or before February 27, 2015.

SO ORDERED.

1. Efficiency Vermont delivers the EEU's services throughout most of the state. The City of Burlington Electric Department ("BED") delivers EEU services in its service territory.

Dated at Montpelier, Vermont, this 13th day of February, 2015.
