Re: Case No. 24-3351-INV – Investigation into the potential need for transmission system improvements identified in the 2024 Vermont Long-Range Transmission Plan

Case No. 26A-1277 – Green Mountain Power Corporation reliability plan for the northern and northwest reliability areas

Dear Ms. Anderson,

Green Mountain Power (GMP) respectfully requests a one-week extension of the deadline to respond to the Commission's *Order Requesting Comments on Reliability Plan and Responses to Information Requests*, in the above-referenced proceeding.

GMP asks that the current August 21, 2026 deadline be extended to August 28, 2026, and we also propose extending the deadline for other parties' comments by one week, from September 4, 2026, to September 11, 2026.

The requested extension will provide GMP time to work with VELCO and GMP's load forecaster, Itron, on needed data and analysis to best respond to the Commission's information requests while keeping the same amount of time for other participants to review our responses before submitting comments.

GMP has shared this request with the other parties in this proceeding and is authorized to represent that the Department of Public Service, Vermont Electric Cooperative, Washington Electric Cooperative, Vermont Public Power Supply Authority, GF Power, City of Burlington Electric Department, Town of Stowe Electric Department, Vermont Electric Power Company, and Efficiency Vermont, agree to the extension.

Thank you for your consideration. Please reach out with any questions.

Sincerely,

A handwritten signature in black ink, appearing to be 'K. Hassan', followed by a long horizontal line.

Kamran Hassan
Director of Substation Operations
