| Tariff filing of Town of Stowe Electric Department for revisions to its interruptible load tariff effective with service rendered on or after October 1, 2026 |  |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|--|

Order entered: 09/30/2026

**ORDER APPROVING TARIFF FILING**

This case involves the tariff filing of the Town of Stowe Electric Department (“Stowe Electric”) requesting approval of revisions to its interruptible load tariff effective with service rendered on or after October 1, 2026. The proposed changes modify the tariff language to “better explain to customers how day-ahead market costs and transmission charges are applied during the snowmaking season.”<sup>1</sup>

Stowe Electric’s interruptible load tariff is available to customers with three-phase primary service at either 34.5 kV or 12.47 kV for any non-residential purpose with a monthly energy usage of 50,000 kWh per month between October 1 and April 30. The only customer taking service under this tariff is Stowe Mountain Resort. The tariff is structured to enable Stowe Electric to pass through the full cost to serve the customer’s snowmaking-related power supply costs. The tariff modifications clarify that Stowe Electric’s charges may be adjusted to reflect changes in transmission costs and that energy charges are based on Stowe Electric’s actual energy purchases to serve the interruptible load.

On September 17, 2026, the Vermont Department of Public Service (“Department”) filed comments recommending that the Commission approve the tariff changes without hearing or further investigation.

The revisions that Stowe Electric proposes to its interruptible service tariff provide clarity regarding how it charges the customer for service under the tariff and provide flexibility to ensure that Stowe Electric is fully capturing the cost to serve the customer. After reviewing

---

<sup>1</sup> Prefiled testimony of Michael Lazorchak (“Lazorchak pf.”) at 5.

Stowe Electric's tariff filing and accompanying documents, as well as the Department's recommendation, we conclude that the proposed changes to the interruptible service tariff are just and reasonable. Accordingly, the revised tariff is approved effective October 1, 2026.

**SO ORDERED.**

Dated at Montpelier, Vermont, this 30th day of September, 2026.
