Case No. 18-2660-INV: Notice of Workshop – Comments by ChargePoint

March 1, 2019

Pursuant to the Vermont Public Utility Commission’s (“Commission”, or “PUC”) Notice of Workshop, issued on February 4, 2019 in the above-referenced docket, ChargePoint, Inc. respectfully submits these comments and request to participate in the pending Workshop on March 15, 2019.

I. INTRODUCTION AND BACKGROUND

On February 4, 2019, the Commission issued a Notice of Workshop on rate design and grid management. The Commission requested that participants file comments addressing a series of five topics, including EV-specific rate offerings, demand charges, incorporating new load from EVs into the grid, potential grid benefits from transportation electrification, and the accuracy of electric metering and submetering technology.

II. Comments by ChargePoint

ChargePoint has addressed aspects of all of the topics identified by the Commission in previous rounds of comments and reply comments, and will therefore refrain from including duplicative comments in the record.

III. Request to Present at PUC Workshop

ChargePoint respectfully requests to make one or more presentations on the topics identified in the Notice of Workshop. We would prioritize presenting on best practices in load management and electric vehicle rate design, but defer to the Commission on which topics would be of most interest.

IV. Conclusion

Thank you for your consideration. ChargePoint looks forward to participating in the Workshop on March 15.
