Filed Electronically in ePUC, Case Number 18-3810-INV

July 31, 2019

Mrs. Judith Whitney, Clerk
Vermont Public Utility Commission
Peoples United Bank Building, 4th Floor
112 State Street
Montpelier, Vermont 05620-2701

Re: Case 18-3810; Request for Comment on RES Data Collection and Compliance Spreadsheet

Dear Mrs. Whitney:

On behalf of Green Mountain Power ("GMP") I am providing comments in response to a memo from Elizabeth Schilling dated July 23, 2019, requesting comment with respect to the accompanying RES Data Collection and Compliance Spreadsheet.

- i. On the general info tab of the RES Data Collection and Compliance Spreadsheet, cell B27 and B28 indicate Hydro-Quebec System Mix at 99% renewable and New York System Mix at 95%. The percentages are just a place holder and should be highlighted in yellow indicating that this data point needs to be updated by the utility. GMP will submit 99.998% for Hydro-Quebec based on our attestation letter that will be included with our filing.
- ii. On the CY GIS export tab, GIS now has additional attribute types listed, therefore, if a user were to follow the instructions explicitly and copy/paste the report into the workbook provided, the data would not match the column headers. The additional columns that need to be added are CT Class I FERC, MA CES and NH CL Bio in the order as displayed in the GIS UI.

GMP appreciates the opportunity to comment. Please reach out with any questions.

Sincerely,

Melinda Humphrey
