**VERMONT AGENCY OF NATURAL RESOURCES COMMENTS ON  
POTENTIAL FURTHER EXTENSION OF COMMISSIONING DEADLINES**

The Agency of Natural Resources (Agency) hereby submits its comments to the Vermont Public Utility Commission (Commission) in response to its Order Requesting Comments on Potential Further Extension of Commissioning Deadlines in Case No. 20-0789-INV dated November 25, 2020.

**BACKGROUND**

On April 30, 2020, the Commission issued an Order Requesting Comments on Potential Further Extension of Commissioning Deadlines in Case No. 20-0789-INV. Specifically the Commission asked for comments on whether, in light of the conditions caused by the COVID-19 pandemic, it would be appropriate to grant a one-year extension of all commissioning deadlines for net-metering and standard-offer projects whose commissioning deadlines fall on or after March 25, 2020, through December 31, 2020. Following that process, the Commission extended by one year all commissioning deadlines for net-metering and standard-offer projects whose commissioning deadlines fell on or after March 25, 2020, through December 31, 2020. The Commission has now asked for comments by December 7, 2020 on whether, in light of the conditions caused by the COVID-19 pandemic, it would be appropriate to grant a one-year extension of all commissioning deadlines for net-metering and standard-offer projects whose commissioning deadlines fall on or after December 31, 2020, through March 1, 2021.

**DISCUSSION**

The Agency previously provided comments in response to the Commission's April 30, 2020 Order, which the Agency believes are also applicable here. The Agency agrees that under the current circumstances surrounding the COVID-19 pandemic, it would be appropriate to grant a one-year extension of all commissioning deadlines for net-metering and standard-offer projects whose commissioning deadlines fall on or after December 31, 2020, through March 1, 2021. The Agency also notes that inherent in the activities leading up to commissioning, certain new generation facilities may be required by their Certificate of Public Good, Memorandum of Understanding (MOU) executed with the Agency, or various Commission Orders as the case may be, to undertake certain activities with respect to the 30 V.S.A. §248(b)(5) criteria. These could include but are not limited to natural resource assessments, wildlife and plant surveys, field studies and delineations, or sampling or monitoring activities. Some of these activities may have seasonal restrictions associated with conducting them, as well as specific timeframes for reporting the results, all contained within the CPG, MOU, or Order. In addition, there may be restrictions placed on the timing of certain construction activities, if for example, deer wintering yards are present.

It is the Agency's understanding that any deadlines, restrictions, or timeframes associated with those activities would remain in place, and extensions for those activities, if needed, would be addressed on a case-by-case basis. The Agency has also reviewed and supports the comments made by the Department of Public Service in this matter.

Vermont Agency of Natural Resources  
Comments Re Order Requesting Comments on  
Potential Further Extension of Commissioning Deadlines  
December 7, 2020  
*Filed via ePUC*

The Agency thanks the Commission for the opportunity to provide comments on  
this issue.

Dated December 7, 2020, at Montpelier, Vermont.

Respectfully submitted,

State of Vermont  
Agency of Natural Resources

Sincerely,

---
