Photo 1: View from the entrance to the existing access road on Upper Loveland Road looking southwest toward the Project.

Photo 2: View from the entrance to the existing access road looking south toward Upper Loveland Road.

Photo 3: View from Upper Loveland Road looking north.

Photo 4: View from the switchback turn on the existing cell tower access road looking southwesterly toward the Project, located approximately at/near the top of slope.

Photo 5: View from the end of the existing cell tower access road looking northwesterly toward the northern end of the Project. The cell tower facility is visible on the left side of the photo.

Photo 6: View from the end of the existing cell tower access road looking northeast toward Upper Loveland Road.

Photo 7: View from the northern end of the Project looking south at the Project area. The cell tower is off the photo to the left.

Photo 8: View from inside the Array looking north.

Photo 9: View from the southeast edge of the Array looking northeasterly.

Photo 10: View from the southeast edge of the Array looking northwesterly.

Photo 11: View from inside the Array looking west toward the 150 foot utility corridor.

Photo 12: View from the northern edge of the Project looking southeasterly. The cell tower is visible on the left side of the photo.

Photo 13: View from Upper Loveland Road looking southwest toward the Project.

Photo 14: View from Upper Loveland Road looking northwesterly toward the Project.

Photo 15: View from Upper Loveland Road looking northerly toward the Project.

Photo 16: View from Upper Loveland Road looking west toward the Project. The top of the cell tower is visible in the photo. The Project proposes clearing that will include most of the evergreens on the left side of the photo.

Photo 17: View from River Road looking north toward the Project. The Connecticut River is visible on the right side of the photo.
