McCormick, John [PUBCOM]

The EAG discussion of early credits being made available to the O.E.O. Weatherization Assistance Program opens an impossible verification to determine the value of the credit. W.A.P. weatherization about 1,200 homes in 2023 and projects about 1,500 homes in 2024. Each home was retrofitted based upon the building's structure and presence of vermiculite in the attic. Mobile and modular homes provided separate challenges. Thus, verification, by PUC, will be impossible.
