09/27/2024	Andrew, Rianhard William [PUBCOM]	I struggle with accepting wood as a source for electricity unless it is only for peak demand periods and has stricter standards for ATFS wood sourcing. I also think it can reduce incentives for rooftop solar installations if the city is near their "renewable" target. -Woody debris left in the woods has many benefits -Consider the extra erosion or timber stand damage needed to get that wood out -Not that low emissions- Lots of diesel or gas burned to cut, skid, chip, truck & process the wood	Filed
