Clean Heat Standard Comments

Message

I believe the only sensible recommendation for the PUC to make to the legislature is to not move forward with a Clean Heat Standard in 2025, to repeal Act 18, and to amend the Global Warming Solutions Act to reflect realistic goals on logistically achievable timelines and on a scale that Vermonters can afford. Vermonters are being taxed out of this state and for what? The pain that these unattainable, insane laws are causing Vermonters will make absolutely no difference on the global scale.
