Subject

Act 18

Message

Act 18 is not just a study. The Global Warming Solutions Act is law, and mandates that Vermonters lower our greenhouse gas emissions to 26% below 2005 levels by 2025, 40% below 1990 levels by 2030 and 80% below 1990 levels by 2050. Those dates and targets are not negotiable.

Those dates and targets cannot be met without spending millions or even billions of dollars from Vermonters. And for what reason? Vermont's contribution to the global warming is so insignificant as to be meaningless. Let's repeal Act 18 and set in place a more reasonable plan to lessen use of fossil fuels, encourage alternative energy sources, and prepare for more warming. But keep it reasonable.
