To whom this may concern,

I was born and raised in this great state in 1974. Purchase my first home in 2004 by qualifying for a no money down low interest loan with 2 kids we struggled in paying for heat then. As an employee of a fuel company for the last 24 years I've seen so many residents of this state continue to struggle with the current costs of heating oil. They struggle to purchase groceries and clothing for their children, they including myself do not have the bank accounts to purchase new heating systems for ourselves let alone pay a tax so someone more wealthy can get a break from us paying the TAX! We have had enough this state is losing the support of the people who made this state what it is today. Our taxes have currently increased and now this. You do not have my support on this I vote NO on the clean heat!

Sincerely, Jason Sprague
