The State Legislature did not represent the interests of the citizens of Vermont when voting on this legislation. The super majority voted in the interests of its party's out of state donors and supported a progressive ideology that doesn't originate with the citizenry of Vermont.

We have reached a point of no return. There is no common sense collective intellect in our legislature. The overreach and control of this legislature has reached a state of oppression.

As such, our family can't foresee a future in this state. We will be forced to spend our earnings on government determined ideology. We have lost our ability to choose. We no longer have any hope of a voice as this state moves to the one party rule.

We are moving into the retirement phase of our lives. Our retirement planning never included a scenario where our state government would force us to buy things we don't want or to spend tens of thousands of dollars changing how our home is heated. And doing it by cutting off our supply to what has always been cheap, clean fuel.

To every legislator: my wish for you is that one day, people force you to live your life according to ideologies you don't share, create oppressive manipulation to get you to comply, rob you of your savings, and then gleefully sit back and high five each other while you watch your life plans crumble.
