Dear PUC Clerk,

I am opposed to this Act as it will double home heating fuel costs and create more expensive bureaucracy to facilitate carbon credits when Vermont's Electrical Grid Experts have testified that the Grid cannot support this nor is there Capital investment with timeline to support this either. Along with the Heatpump manufacturers supply chain not being able to deliver in accordance to said timeline nor do they have the labor to install this.

This is a major legislative fail and more along the lines of meeting a Global World Economic Forum's Agenda. This should be a Referendum on the Ballot for taxpayers to Vote on.

Vermont is over burdened by this Spend and Tax Legislature that does bring value to their Constituents.

If Elected To State Senate next week, I will be Voting to Repeal the Vermont Global Solutions Act and the Clean Heat Standards Act 18.

Best Regards,
Maureen A. Heck
