Dear Ms Anderson,

Please make sure in this design that Biofuels for Oil and Propane are allowed in this ruling. Also make sure that the people who install the systems to meet the standard receive the credits not the electric utilities. The clean heat credit forms must be verified by the PUC so that fraud with this system can be prevented. The fee for fuel dealers based on the sale of gallons of oil and propane and kerosene needs to be done in cents per gallon.

Sincerely

--
