To Whom it May Concern,

I am emailing concerning the proceedings around the potential Clean Heat Standard. As a life-long Vermont resident, I have many concerns with the path we are on as we pursue this standard. During discussions, I respectfully request that items like the following be considered:

- Products like Propane Gas and Bio Fuel should be included in Clean Heat credits.
- Determine the price per gallon that will be assessed to dealers and ultimately, of course, Vermont residents, and make it known. Too much is being decided without knowing the financial impact to Vermonters.
- Clean Heat credits should be given to the installers of appropriate equipment.
- Develop a process to certify Clean Heat credit applications through the PUC to help eliminate the potential for fraud.

Thank you for your consideration.
