Hopefully because it's the weekend this can be added to the public comments that closes Nov 1, 2024. I apologize for the lateness of this submission.

As I wrote to the Governor this heat bill is a disaster and I for one will absolutely refuse to comply. Litigation would definitely and defiantly come from me and many others I have spoken with.

We don't live under a dome in Vermont, we all care about the environment, but we are the mist of a drop in the water on this issue. The ridiculous cost of this to already over taxed VT'rs is not reality.

Whist the USA ships coal to China/India to help fuel their old and new forthcoming coal plants our legislators think it's a good idea to force this down our throats when it will do nothing to improve the situation. We are all in this together globally and until we are all in it together this bill is insane!

No one (particularly VT) can afford this, there isn't no way near enough contractors, and I firmly believe this is a violation of my independent rights. I use wood/oil and right now that works for me and it will continue that way period.

Thank you in advance for hopefully accepting this even though it is admittedly two days late!
